

SUSTAINABILITY

STATEMENT

Wexler Packaging Products recognizes its responsibility to conduct business in a way that protects and improves the environment for future generations.

Our commitment to sustainability has three components:

- 1** Our commitment to provide all industries with sustainable packaging and bundling solutions that help to reduce waste and promote material conservation.
- 2** Our commitment to offering quality equipment and products that are cost-effective and minimize the overall environmental footprint.
- 3** Our commitment to taking a leadership role in educating Wexler employees, suppliers, customers and prospects on the best solutions for achieving environmental excellence in packaging.

Wexler's sustainability initiatives are rooted in a belief that a commitment to the environment is not a burden, but rather an opportunity to explore alternative packaging solutions. Less waste = less burden on the environment.

“Go Green” with Banding!™
