

Wexler Packaging Products Brings Innovative Solutions to Booth #8551 at IPPE 2019!

Wexler Packaging Products is headed down south in February for the International Production & Processing Expo in Atlanta, Georgia. From February 12th-14th, we will be grilling up some wonderful connections at the Georgia World Congress Center alongside 1,200 exhibitors and over 30,000 attendees. Be sure to add booth #8551 to your agenda to see some of the most innovative packaging technology on the market today.

Upon entering our booth, you will get the opportunity to see the Ravenwood Nobac 500 in action. This versatile machine is a linerless labeling system that is capable of applying numerous label formats to a variety of products, all with just one machine. It eliminates the need to turn packs and is specifically designed for maximum flexibility and rapid changeover between wrap formats. Thanks to the Nobac 500, you can lower your carbon footprint and reduce packaging waste with one simple choice.

You will also be able to witness banding with the ATS US-2100-R, which is the perfect machine to achieve “Branding with Banding.” This stainless-steel machine processes paper and film bands 3” or 4” wide and can apply the band around your bundle using an ultra-sonic seal, eliminating additional costs and labor associated with inner packs. Banding with a wider material, combined with the option of custom imprinting, can instantly turn the large band surface into the perfect advertising/branding platform.

IPPE is expanding into more halls this year and is set to be bigger and better than ever. Its focus this year is on innovation, education, global reach, and networking. You will also have the option of attending any of the several different activities the show is offering, including a Chili Cook-Off, Product Cooking Demos, free and paid educational seminars/workshops, and so much more. The educational opportunities are not only during the show either – you can sign up to be a part of workshops from February 11th through the 15th.

If you wish to be included in the 2019 IPPE attendee list, be sure to register before January 14th. And don’t forget to stop by booth #8551 where you will get to see live demonstrations of our machines and meet the Wexler team – the true experts in the packaging, labeling, and banding world!
