

COIL-TYER

PIVOT ARM TYING

Every tying application is different, especially when it comes to coils that can be difficult to contain. That's why we designed the Coil-Tyer, a machine specifically for efficient tying of products from garden hoses to V-belts to surgical tubing. Because securing your coils shouldn't require messy tapes or expensive twist ties.

OPERATIONAL EFFICIENCY

The Coil-Tyer features an ergonomic design that makes product pass-through quick and easy.

The angled table allows for ties to be created through the center of your coils rather than around the entire product, preventing dents and damage to the outside walls.

At speeds up to 20 coils per minute, the Coil-Tyer can help improve your efficiency and reduce operating costs for years to come.

A FEW HIGHLIGHTS

- Minimal maintenance requirements
- Designed and built in the US
- World-class technical service post-sale
- Utilizes economical materials including elastomer, twisted poly, polytape, and twine
- Free training for life
- Multiple machine sizes available

I LOVE FELINS' MACHINES. THEY ARE RELIABLE, [REQUIRE] VIRTUALLY NO MAINTENANCE, AND THE MATERIAL COST IS THE LOWEST AVAILABLE!
